**VETERINARI AGOPUNTORI
DEL MEDITERRANEO**

BA GUAN ZI

- The technique uses glass cups, in various sizes, that can cause a moxibustion action or a bloodletting type

- 
- compressions and decompressions action
 - increases the local blood circulation of 300%
 - wind-cold-humidity
 - gastroenterology, rheumatology and gynecology.

- 
- Fire water wind
 - Therapeutical effects:
vascular, spasmolytic, anti-inflammatory,
lymphatic drainage, analgesic,
detoxifying, trophy stimulating,
regenerative and reparative,
immunostimulating and antifibrotic

History

- Ben Cao Gang Mu Shi Yi

"" in the cups there's a fire air association,
they excrete the harmful wind".

An ancient medical Taoist practice 281 ac

The use was perfected under the

Dynasty Tang 618 dc

Quing Manciu' 1644dc

The suction was the main treatment for
pulmonary tuberculosis

technique

Zhao Xuemin Qing Dynasty

"Supplement to Compendium of Materia Medica"

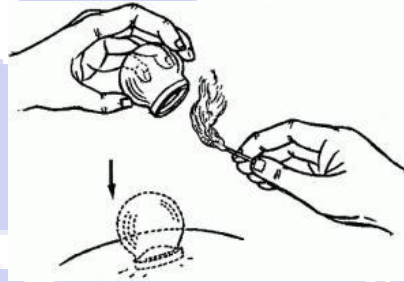

Entire chapter dedicated "Jar qi fire"
(huoquan qi)

bamboo or ceramic cups, to relieve wind-
cold headache

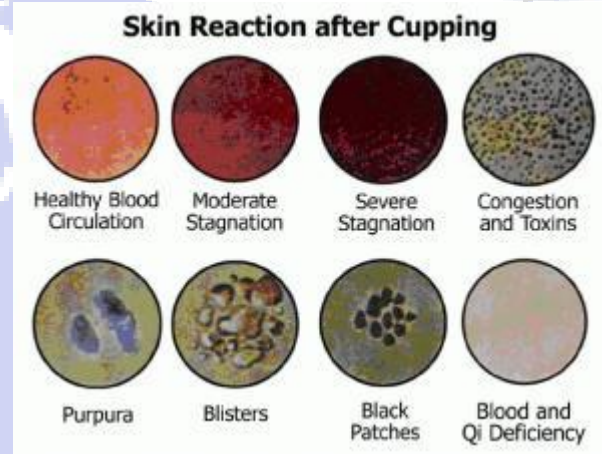

technique

- The technique consists in introducing fire inside a small glass or bamboo or ceramic cup, ecc.
- Creates a depression.
- Power to removing
 - the Qi/Xue stasis,
 - Activating the Qi circulation in the Sun Luo capillaries and the blood in the microcirculation.
 - “dissipate on the outside” the Perverse Xieqi Factors COLD HAN and DAMP SHI
 - activating the organically defences and calming the pain.

Stagnation level

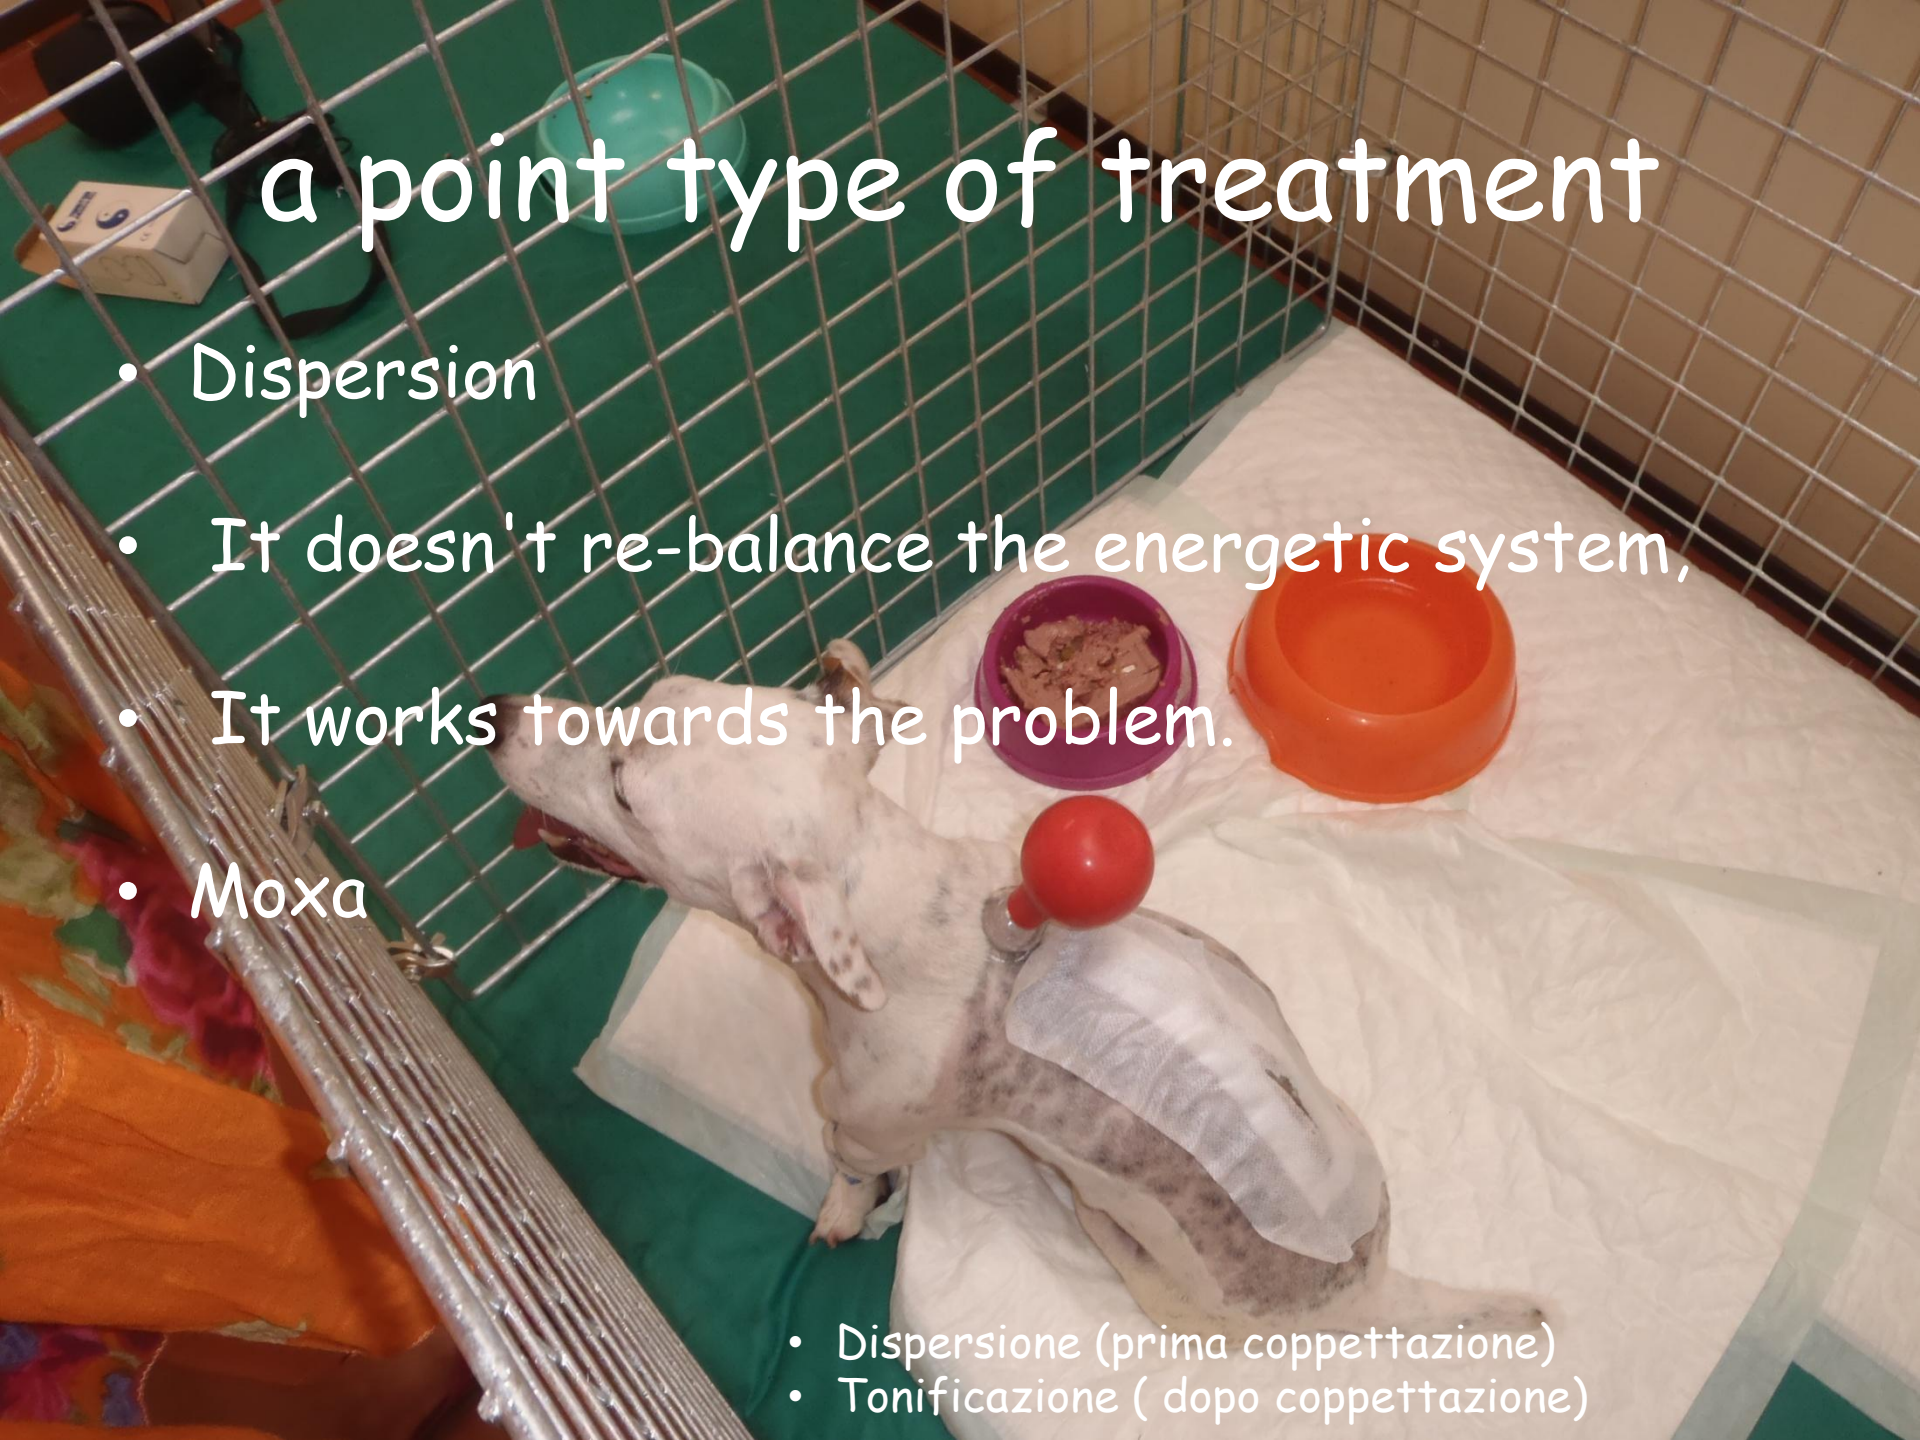

Leaving the cups on the skin for too much time can cause detachment and burns.

a point type of treatment

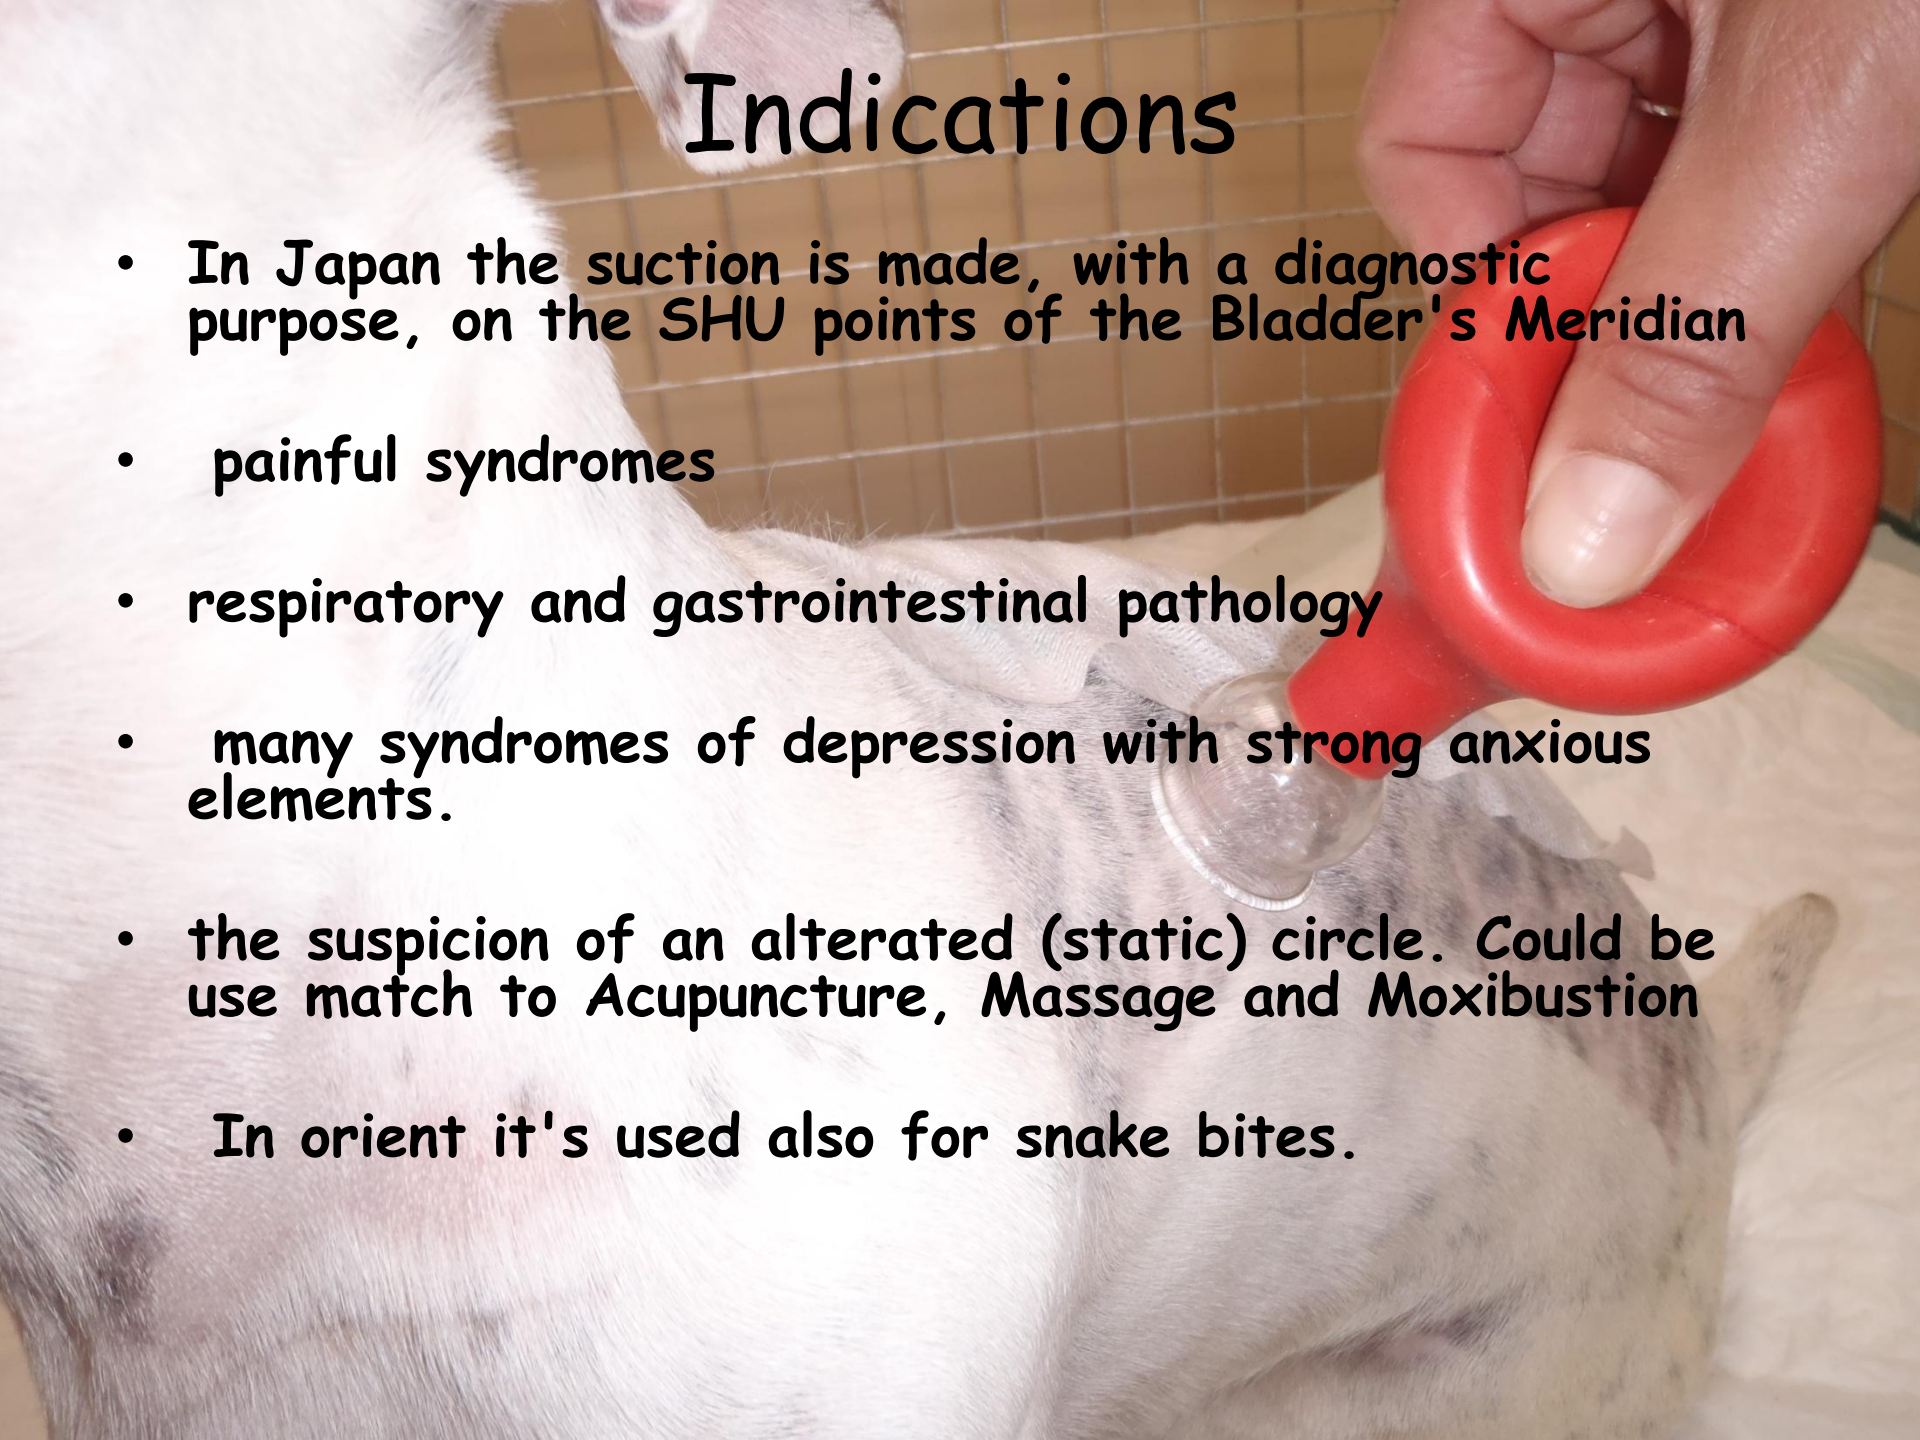

- Dispersion
- It doesn't re-balance the energetic system,
- It works towards the problem.
- Moxa

- Dispersione (prima coppettazione)
- Tonificazione (dopo coppettazione)

Indications

- In Japan the suction is made, with a diagnostic purpose, on the SHU points of the Bladder's Meridian
- painful syndromes
- respiratory and gastrointestinal pathology
- many syndromes of depression with strong anxious elements.
- the suspicion of an altered (static) circle. Could be use match to Acupuncture, Massage and Moxibustion
- In orient it's used also for snake bites.

INDICATIONS

in the illness where the wind conveys cold
(cooling syndrome) or cold and damp
(joint problems; BI syndrome)

12BL to avoid the wind to enter

INDICATIONS

Qi and Xue stagnation

in painful situations caused by qi and xue stasis "blood is qi's son and qi is blood's commander"
back Shu points.

INDICATIONS

Digestive system's illness

diarrhea, poor appetite, abdominal pain

12CV Zhong Wan

13-14 LV liver that attacks the spleen
(nervous diarrhea)

INDICATIONS

 Asthma or strong respiratory forms

17CV shanzhong increase wei qi

Back Shu

13BL LU shu

14BL PC shu

On strong or chronic forms used on the back shu.

INDICATIONS

 Chronic lumbar pain from Ki deficit or
perverse qi or stasis

penetration of perverse energy or blood
stagnation (herniated lumbar)

40BL Weizhong

 Ashi points treatment

symptomatic points, painful when pushed.

 Joint phlegm stagnation

damp is hard to deal with because it's sticky
and goes downwards.

METHOD

Weak suction

Medium suction

Strong suction

V.A.III.

VETERINARIOPUNTORI
DEL MEDITERRANEO

Moving suction

- we put on the zone gel or oil and, after creating vacuum, we drag the cup. It's really painful but effective (usually on back, TH meridians, GB, B.)

Needle suction

reinforce the needle action

it's used in
full condition with

the aim of draw
blood and energy

towards the outside;
or also to tone up drawing Xue e Qi towards
the zone.

Moxa suction

it's used to tone up and move the Qi: the moxa is applied on the needle, left there burning completely and when it stops smoking we apply the cup.

Full suction

bloody method: we make the spot bleeding, apply the cup that fill up with blood (hypertension).

Veterinary Field

- A big obstacle in the fur presence
- Fire
- Cup with a pump
- Major therapy matched with other methods (needle- massage)

- weak or medium suction
- Toning action
- Reactive Qi and Xue cronico and/o stasis

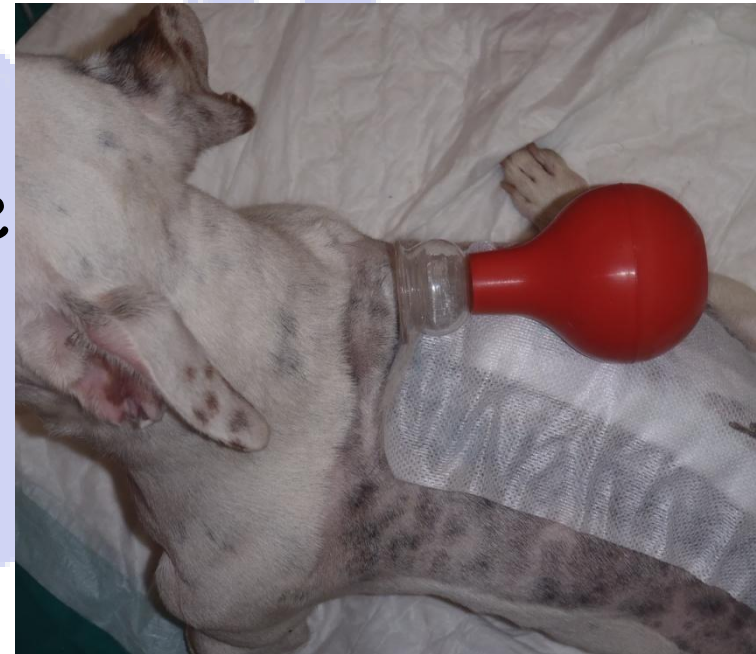

method

- leaving the cup on between 5 and 15 minutes
- making a sort of fast vacuum and decompression to quickly reactivate the energy.

Indicazioni

- hemylaminectomy surgery to reactivate the Qi
- Contractures
paravertebral muscle
Old subjects , Bi Syndrome BI
Incorrect walking
- Knee's joints injuries
